ryashasvi77@gmail.com | LinkedIn | GitHub

SUMMARY

Computer Science Engineering undergraduate (AI & ML) with a strong base in algorithms, data structures and object-oriented design, driven by solving real-world problems through technology. Built AI-based applications in Python and Java, applied computer vision with OpenCV, and contributed to a published patent. Recognised at national-level hackathons for rapid prototyping and teamwork. Eager to contribute to defence-oriented research in intelligent systems, surveillance and secure technologies.

EDUCATION

Oriental Institute of Science and Technology | Bhopal, India Sep 2024 – Present
B.Tech in CSE (Artificial Intelligence & Machine Learning) **CGPA: 8.35**
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Web Technology, Project Management

TECHNICAL SKILLS

- **Programming Languages:** Java, C++, Python, JavaScript (ES6)
- **Backend Development:** Core Java, Collections Framework, Exception Handling, Multithreading (Basics), Spring MVC, RESTful APIs
- **Machine Learning:** NumPy, Pandas, OpenCV
- **Frameworks & Tools:** Git, GitHub, VS Code, IntelliJ IDEA, Supabase, Tailwind CSS
- **Databases:** MySQL

EXPERIENCE

Google Developer Groups (GDG) OIST – Organizer & Technical Team Member Live | GitHub
- Designed and built the official GDG OIST website in React and Tailwind CSS over 2 months as one of 2 developers, shipping a responsive, cross-device site.
- Integrated Supabase and Firebase to power a CMS managing 5–6 pages of dynamic content (events, team info), enabling non-technical team members to update content without code changes.

BTG by CII – AI/ML Contributor (Tender Live) GitHub
- Developed AI-powered tender discovery and document analysis workflows using Agentic AI and Google Gemini.
- Implemented tender data extraction to identify deadlines, budgets, and eligibility criteria using Python, BeautifulSoup, FastAPI, Google Gemini, and Agentic AI.

PROJECTS

Automated Email Writer GitHub
- Built an AI-powered tool to generate context-aware email replies with customizable tones.
- Integrated Groq AI with Gmail using a Chrome extension for automatic reply generation.
- **Tech Stack:** Java, Spring Boot, React, Groq API, Chrome Extension, Docker

Dev-os GitHub
- Built an AI-powered codebase intelligence platform using RAG and semantic search for context-aware code retrieval.
- Indexes and understands live repositories through parsing, chunking, and vectorization.
- **Tech Stack:** Python, FastAPI, Next.js, PostgreSQL, pgvector, Sentence Transformers, RAG, Gemini, Groq

AI-Powered Citizen Services Portal GitHub | Demo
- Built a conversational AI portal for easy access to government schemes and procedures.
- Helped users find relevant public services faster, reducing time spent searching for information.
- Implemented a secure contact system using NodeMailer for user feedback and update notifications.
- **Tech Stack:** React.js, TypeScript, Vite, HTML, CSS, Vercel

Face Detection System GitHub
- Developed a face detection system for images and videos using Python, OpenCV, and computer vision techniques.
- **Tech Stack:** Python, OpenCV, Computer Vision

ACHIEVEMENTS & CERTIFICATIONS

- 2nd Runner-Up, Google Developer Hackathon – Tech Sprint ’26 (100+ teams)
- Selected among 21 teams from 1,000+ applicants, MANIT Bhopal Hackathon; built an AI-powered Event Recommendation System in 36 hours.
- Selected among 10,000+ national entries, Hack&Make – MP Startup Summit 2026.
- Qualified for Round 1 of Google’s The Big Code 2026, ranking among the Top 15,000 participants.
- NPTEL Certified Java Developer – Silver Badge (87%) – Certificate
- Indian Patent Published – AI-Based Drone for Crop Monitoring – Certificate
- Winner of the SDE Sheet challenge by Takeuforward
